PEEL WATERSHED FINAL RECOMMENDED LAND USE PLAN CONSISTENCY CHECK

YESAB Project #	2012-0092		
Project Title:	Crest Remediation		
Date:	April 11, 2012	Completed by:	Sam Skinner
		(name)	
Submitted to:	YESAB Mayo Designated Office		
	Box 297		
	Mayo, YT Y0B 1M0		

Project is consistent to the Final Recommended Peel
Watershed Regional Land Use Plan: (select one)

Yes

Background Information and Conformity Check Analysis

Affected Landscape Management Unit(LMU)(s): Map 1 and Section 5

Landscape Disturbance Indicators*: Surface Disturbance (ha):										
LMU	Cautio Level	nary	Critical Level	Current est. Level		oject timate	Total Estimate	Notification Rqr'd**	Parties Notified	
9	0		0	Not yet provided	0		Not determined	No	No	
Linear Disturbance (km):										
LMU	Cautio Level	nary	Critical Level	*Current est. Level		oject timate	Total Estimate	Notification Rqr'd**	Parties Notified	
4	0		0	Not yet provided	0		Not determined	No	No	

^{*} Surface disturbance indicators do not apply existing mineral claims.

^{**} the YLUPC shall notify the Parties prior to submitting the conformity check to YESAB if they are concerned cautionary or critical levels may be reached

Special Management	Considerations:	(Section 5, LMUs)
---------------------------	-----------------	-------------------

The upcoming Northern Mountain Caribou Action Plan may be relevant to management of land-use activities in this unit.

Affected Values and General Management Directions (GMD): (Section 5) Only include values identified in LMU. If no GMDs exist or are relevant, do not include in this table.

Bonnet Plume Caribou Herd Avoid or reduce activities in significant wildlife habitats during important biological periods (e.g., utilize timing windows): the proposed project is within a Fall Key Area for the Bonnet Plume Herd. Contaminated Sites Policy Recommendation #4: Contaminated sites should be remediated, with the priority being those sites with the highest potential to negatively affect water quality and/or tourism and big game outfitting. Heritage, Social, Cultural Resources: All subsections No relevant GMD Economic Development: Air Access Policy Recommendation #16: In the Conservation Area, outside of existing dispositions, new airstrips should not be allowed. Existing	Ecological Resources:	Corresponding GMD:

Additional Analysis or Comments:

- This project shouldn't result in any additional linear or surface disturbances since it will be on previously disturbed areas. This project may also hasten recovery of these disturbed areas, resulting in a slight reduction in cumulative impacts.
- However, the biggest potential for conflict or disturbance resulting from this project will likely be due to air traffic. The best management practices listed above should be heeded to help mitigate concerns.
- Considering this area is adjacent to a big game outfitting base camp and to several large streams, it conforms nicely with Policy Recommendation #2 (Contaminated sites should be remediated, with the priority being those sites with the highest potential to negatively affect water quality and/or tourism and big game outfitting).
- Strictly speaking, this project is consistent to Policy Recommendation #16 (In the Conservation Area, outside of existing dispositions, new airstrips should not be allowed. Existing airstrips and landing locations may continue to be used, however) since air traffic will use an existing airstrip. However, significant and persistent improvements to the airstrip (outside of any mineral claims) would be counter to the intent of this recommendation.
